

snapshot

Create and manage snapshots.

Usage

```
create snapshot      snapshotof=<volName> [size=<size>[kKmMgGtT]]
                    [options=<lvCreateOptions>]
delete snapshot <snapName>|<volName>
reset snapshot [volName] | [snapName]
rollback snapshot [snapName]
copy snapshot <snapName> <destVolName>|<device>
set snapshot <snapName> [size|capacity=<size>[kKmMgGtT]]
set snapshot <volName> interval=<none|frequent|hourly|daily|monthly>
                    [period=integer] [keep=integer] [offset=integer]
set snapshot <volName> [groupTag=string]
show snapshot [<volName>|<snapName>]
```

Examples

```
mayaccli create snapshot snap_test snapshotof=testvol size=20G
mayaccli show snapshot
mayaccli set snapshot testvol interval=daily period=3 keep=8
```

Output
